SUMMARY

Passionate problem-solving software developer experienced with 3.5 years in the software industry including 3 years of career as software developer skilled on .NET and .NET Core. I am an independent, self-motivated .NET developer eager to accept any challenges and always dedicated to the responsibilities.

EXPERIENCE

November 2022 – Present

SOFTWARE ENGINEER I

Cotiviti Nepal PVT. LTD, Hattisar, Kathmandu

Quality Intelligence-Quality Reporter

.NET based measurement and reporting software which analyse, communicate, and improves clinical and financial performance with industry leading HEDIS reporting**.**

Feb 2021 – November 2022

JUNIOR .NET DEVELOPER

Silicon Soft PVT. LTD, Tinkune, Kathmandu

Projects Worked:

E-Sifaris

> **.NET** based web application that has been used by more than dozens municipality for automating the recommendation letter and various other official works. This application was developed through effective collaboration of different team members.

Content Management System (Alfa Beta)

> **.NET** based content management system of alfa beta consultancy. Fully dynamic web application was made on such a way that it enabled authorized personnel to manage and modify content of the website without any specialized technical knowledge.

Parlour Management System (Beauty Hub)

> **.NET** based web application which is both content management and appointment system. It was made in such a way that authorized personnel could easily manage and modify content of the website and users could easily book appointment through the website.

Family Tree

> **.NET** based web application for dynamically managing family tree from generation to generation. Users could create their profile with various information like name, contact

number, email and family details which would be automatically shown in tree format. This could preserve identity of users from generation to generation.

Human Resources Management System

.NET based web application which was used by Silicon Soft itself for managing human resources and related processes. Employee management, leave management, attendance management was incorporated in this system.

AIMS

.NET based web application for managing services and medicine in the ayurvedic hospitals. AIMS software integrates all the fully functional modules with which ayurvedic hospital could manage different aspects whether it is medicine, stock, billing, reporting and so on.

Key Roles and Responsibilities

- Design and develop the application based on **.NET** with **SQL Server** as Database.
- Create technical documentation for reference and reporting.
- Collaborate with frontend team for nurturing the web application.
- Work in team to produce the application.
- Reflect the development process and outcome on with all team members.
- Publish and deploy the application in environment.
- Responds to support requests from end users and patiently walked individuals through basic troubleshooting tasks.
- Worked with software development team on reported errors and bugs on newly released software and assisted in deployment of release.
- Follow up with clients to ensure optimal customer satisfaction following support engagement and problem resolution.
- Work continuously on a task until completion (or refer to a software developer, if required)
